

WHEAT NAMES SUPERVISOR AT HOSPITAL

O'Donnell Is Appointed as Nurse

DEFINITELY Position Created as Part of Plan

Cautioned not to be a nurse, O'Donnell is a young woman who is a graduate of the nursing school at the University of Cincinnati.

Monday morning, O'Donnell was seen at the hospital, where she is to be in charge of the nursing department.

Some comments on the new appointment of O'Donnell as nurse at the hospital.

It is a month ago that the hospital board of directors met to consider the appointment of O'Donnell.

At that time, the board was divided on the question of whether or not to appoint O'Donnell.

Today, however, the board has decided to appoint O'Donnell as nurse at the hospital.

The board's decision was based on the recommendation of the hospital's medical staff.

It is believed that O'Donnell's appointment will be a great help to the hospital.

She is a very capable and efficient nurse, and it is hoped that she will do a great deal of good for the patients.

Farmers Report Harvest Labor Shortage Here

Some Unable To Get Help Although Nearly 300 Relief Clients at Work

Despite estimates that between 200 and 300 Marion county relief clients were at work in the county's wheat fields on temporary harvest jobs, farmers were reporting difficulty getting enough help to carry them through the harvest season.

County Farm Agent S. I. Anderson said a number of farmers have informed him they are having trouble getting help.

He said that the shortage is due to the fact that many of the relief clients are unable to get work.

Bad Wire Circuits.
ACCORDING TO an announce-
ment recently made at Johns Hop-
kins university, "accidental electrocu-
sion" is said to be on the in-
crease. It is estimated that acci-
dental electric circuits are responsible for
one death out of every one hundred
thousand annually. In most in-
stances this accident could be pre-
vented if the necessary precautions
were taken.

This situation is a grave menace
to all. Several years ago the Ameri-
can Society of Safety Engineers in-
vestigated this problem. It was
found that in the majority of cases
the accident occurred as a result
of a faulty electric wiring in the
house, as well as improper hand-
ling of certain electrical appliances.
It is advised that every home be
periodically inspected and all elec-
trical units checked as to safety
of insulation.

Too many persons are careless
about electrical appliances. They
assume that because they were in
perfect working order when pur-
chased, there is no danger of de-
fective contacts or wiring. They
overlook the fact that with con-
stant use wires become frayed and
damaged and because of this a
short circuit may be caused. Con-
sidering the number of electric ap-
pliances, such as the percolator,
toaster, griddle, iron, hair curler,
vacuum cleaner, washing machine,
and other conveniences, it is sur-
prising that the number of fatali-
ties in the modern home is not
even greater.

Ordinary household current of
one hundred to one hundred and
ten volts is not in itself a dan-
gerous current, but occasionally it
may be of sufficient intensity to
cause severe damage to the heart.
The current may send the heart
into rapid vibrations and result in
death. This danger is especially
prevalent when a wet body comes
in contact with a defective switch
or fixture.

For this reason it is always ad-
visable to avoid touching any elec-
trical outlet while the hands or body
are moist. Many of the fatal acci-
dents caused by electric shock can
be traced to the presence of reach-
ing for the electric light or tele-
phone while in the bathtub. Bear
in mind that even if the body is not
wet but merely moist, a severe burn
or internal injury may result from
contact with the house current. It
can be seen how frequently this
accident can occur.

Wet or moist hands as the result
of excessive perspiration or wash-
ing, should be kept away from an
electric bulb, switch or other elec-
trical appliance. Make sure your
hands are dry before turning the
current on or off. This warning is
especially given to elderly persons
who might quickly succumb to a
moderate degree of electric shock.
As I have stated, it is advisable
that all electrical appliances be
periodically inspected for loose con-
nections or worn wires. All wiring
and repairing should be done by an
experienced electrician. Never tink-
er with electric wiring unless you
are an expert at this work.

Answers to Health Queries
Mrs. T. B. Q.—I seem to be in
good health but I am always very
pale. I have been told that I may
be anemic. What would you advise
in this case?
A.—Make every effort to improve
your general health. Build up the
blood supply. Proper diet and lots
of outdoor life should be of great
benefit and advantage. For full
particulars send a self-addressed,
stamped envelope and repeat your
question.

E.A.A. Q.—I am eighteen years
of age. My hair is very dry and
lifeless. What would you advise?
A.—The condition of the hair is
greatly influenced by the general
state of health and well being. Care-
ful shampooing and the use of a
good hair tonic should bring about
improvement. For full particulars
send a self-addressed, stamped en-
velope and repeat your question.

CLIFF VANCE REPORT

Ex-Kaiser Views Events Now as Mere Spectator

By 1914 the Kaiser was no longer a ruler. He was a prisoner of his own people. He was a mere spectator of the events that were unfolding around him. He was a man who had been a ruler for 26 years, but who was now a man who was no longer a ruler.

Although the Kaiser is not a prisoner of his own people, he is a man who is no longer a ruler. He is a man who is no longer a ruler. He is a man who is no longer a ruler.

At 78 the Kaiser carries on a quiet life. He is a man who is no longer a ruler. He is a man who is no longer a ruler. He is a man who is no longer a ruler.

His days are spent in quiet retirement. He is a man who is no longer a ruler. He is a man who is no longer a ruler. He is a man who is no longer a ruler.

Scouting Moves Forward Under 10-Year Program

National Council Adopts Comprehensive Plan To Broaden Scope of Influence.

Scouting is moving forward under a comprehensive plan adopted by the National Council of the Boy Scouts of America at its annual convention in St. Louis, Mo., last week. The plan, which is the result of a study made by the National Council's committee on the future of the organization, calls for a ten-year program of development and expansion. The plan is based on the assumption that the scouts of today are not only the leaders of tomorrow but also the backbone of the nation's future. It calls for a broadening of the scope of the organization's influence, not only in the field of youth development but also in the field of public welfare. The plan calls for a more active participation of the scouts in the life of the community, not only as leaders but also as citizens. It calls for a more active participation of the scouts in the life of the nation, not only as leaders but also as citizens. The plan calls for a more active participation of the scouts in the life of the world, not only as leaders but also as citizens.

MOTORISTS IN THESE CARS HAD TO GET OUT AND SWIM

Flood waters from the Green river were so far a flood barrier that following torrential rains that motorists caught on Oak street had to abandon their cars to raise and flee to higher ground. A few minutes after the cars were abandoned, the water was so deep that it was impossible to find them.

HALTING POISONINGS

Drastic Punishment for Peasant Killers.

News Service.

The first and largest poisoning affair was discovered in the eastern part of the country, in the village of a district called Tuzsuzug. Cases of sudden death were very frequent in those villages for years. Authorities became suspicious and anonymous letters helped them. Corpses of dead farmers were exhumed and chemically examined. Arsenic was found in all of them. Over 40 men had been killed with arsenic. As a result 36 peasant women have been arrested and tried, most of them elderly women who had committed their murders 10 to 15 years previously.

At the trial, it turned out that poisoning of husbands, brothers, fathers and uncles was regular business in these villages.

Economic pressure was one big reason. "Another was of course, love. Too many wives wished to be rid of their husbands for some one else's sake, divorce was too expensive, how to get rid of husbands and relatives.

Arsenic was much cheaper.

"Devoted" Nurse

Paper with a kind of paste containing arsenic for the extermination of flies was available in every grocery shop. The village midwives and quacks taught their clients how to dissolve the stuff in water or soup. Some women gave the poison to their victims at once—those who were more cautious administered daily small portions during weeks.

A woman whose husband became sick and bedridden nursed him in the most "devoted" way, sat night and day at his bedside and mixed arsenic in his medicine. Later she killed her only son in the same "devoted" way in order to own alone the farm and marry a young man.

Another woman, who had killed her first husband to get a second 12 years ago, killed the second a few years later. She was hanged.

Commits Suicide.

The village midwife, who taught Tuzsuzug wives how to use arsenic and sometimes did the job for them for a few pence, committed suicide at the beginning of the inquest.

In 1933 similar mass poisoning was discovered in another country district, Kereszug. Over a dozen women were sentenced to hard labor for life or 15 years.

Over 500 years sentences of hard labor have been pronounced for killers of 70 to 80 persons in the last four years. Now more stringent measures are sought.

For poison between Paris and Buenos Aires a certificate is being built in France that will carry 50 persons on two decks and have a cruising range of 5,500 miles between stops for fuel.

SHOCKING COSTUME!

When Miss Thelma Robertson, prize-winning bathing beauty of Wichita, Kan., went farmerette, the wheat was shocked but the farmhands weren't.

GRANGE SHOWER HONORS COUPLE

Mr. and Mrs. Ernest Frayer Complemented at Meeting.

A miscellaneous shower complimented Mr. and Mrs. Ernest Frayer who were recently married, at a meeting of United Grange last night at the Claridon school building.

In a business session arrangements were made to sponsor an ice cream social July 18 at the school building. The committee in charge will include Ernest Frayer, Mrs. Stella Trout, John Ruth, Miss Georgia Kramer and Miss Janella Fields.

A report of the work in the third and fourth degrees conferred by United Grange at Denmark July 3 was given by Mrs. Bertha Epley. A short program was followed by a social hour and the shower. Refreshments were served by a committee composed of Mrs. Lawrence House and Mrs. Mae Smith.

The Best Dressed Clubwomen Club will present a program at a meeting July 23.

An electrifying program has been developed for an automobile show and the "Hazardous" play will be presented there.

A process has been developed in Italy for the direct extraction of coffee and from lemon juice without the use of citrate of lime as an intermediary.

BAND TO PROVIDE MUSIC FOR FESTIVAL

The band of Huskies, No. 337, F. O. Eagles, will furnish the music for the Waldo Future Farmers of America festival at the Waldo park on Thursday night, July 18.

Committees in charge of the festival are as follows:

Program and concessions, Wayne Brander, Marion Bogart, Raymond Lichtenberger, refreshments, Paul Rickhardt, Wilbur Kent, Gerald Furris, prizes and souvenirs, Darrell Penman, Earl Augenstein, Lowell Helby, lights, Eugene Krans, Lester Wetzol, William Miller, George Teeter, equipment, Paul Waddell, Donald Demarest, Kenneth Strine, Allen Baker.

KROGER STORES

The Marry-Go-Round

BY HELEN ROWLAND

MENTAL TESTS FOR LOVERS.

The divorce mills would suffer a frightful depression if men chose their wives when rationed, and vice versa. Instead of the usual "I do" and "I will," the ceremony would be a series of tests. First, the man would be asked to pay for the woman's dinner. Then, the woman would be asked to pay for the man's dinner. And the ceremony would end with a series of tests.

I'll drive out spots and stains!

Don't worry! When spots and stains soil your white and color-fast cottons and linens call on me. Out they go, all of them—ink, fruit, beverage, medicine, scorched spots and mildew. I'm just as effective too on wood, porcelain, tile, enamel and linoleum.

CLOROX
PROTECTS...IT DISINFECTS

BLEACHES • REMOVES STAINS • DESTROYS ODORS • KILLS GERMS

NO HOME SHOULD EVER BE WITHOUT CLOROX

As Clorox does its work in laundry, kitchen and bathroom, it helps to make a "healthier" home. It not only cleanses, it disinfects—an added safeguard to health. Because Clorox is a germicide—pure, safe and dependable—it has many important personal uses. It removes nicotine and other stains from hands; makes a soothing foot bath for tired and aching feet and provides an effective treatment for "Athlete's Foot." Let the label be your guide.

"WHY DIDN'T YOU TELL ME? THEY STAY CRISP!"

BLENDED FOR CRISPNESS

HERE'S an amazing new idea in ready-to-eat cereals. The Kellogg Company has discovered a way to blend two grains into one cereal. The result is a revelation in flavor and crispness.

Just enough rice is blended with whole wheat to make Wheat Krispies more crunchy than any wheat cereal ever was before. In fact, when you add milk or cream to Wheat Krispies—they actually stay crisp. Crunchy to the last spoonful.

Buy Wheat Krispies from your grocer today in the large economical package. Enjoy them any time—breakfast, lunch or supper. Always ready to eat. Always nourishing. Crisp and delicious. Try Wheat Krispies tomorrow. Made by Kellogg in Battle Creek.

THRICE SPARED

The man in the portrait is the subject of the 'Thrice Spared' article, which discusses his experiences and the challenges he has faced.

The article continues to describe the man's life and the various ways in which he has been 'spared' from certain fates, highlighting his resilience and the support he has received.

The man's story is a testament to the power of faith and community, showing how he has overcome adversity through the help of others.

The article concludes by reflecting on the man's journey and the lessons learned from his experiences, offering inspiration to readers who may be facing similar challenges.

TASTE THE GRANDEST Ice Cream
A REFRIGERATOR EVER MADE!

Here's ice cream so smooth and creamy you'd never believe it could be made in a refrigerator. New, non-freezing Jell-O Ice Cream Powder makes it. It's grand by itself or serve it sundae style with a sauce of sweetened crushed raspberries.

Would you like to make real ice cream in your automatic refrigerator? The delicious old-fashioned home-made kind? Well—here it is! Jell-O Ice Cream Powder makes it. Hurry and stir up this exciting new ice cream. It takes only a minute or two to mix—a few minutes and the refrigerator does the rest. You'll have that velvet smooth ice cream you've always hoped for. Powder costs very little and makes a full quart of ice cream—tense, says O. J. got family is all in a package and sweet eyes to any heretofore. Get a package of Jell-O Ice Cream Powder, mix, give it a good shake, and you're ready to go. It's a great ice cream at last. A package of Jell-O Ice Cream Powder makes grand ice cream in hand freezers, too.

PROTECT YOUR RIGHT TO DRIVE
PROOF of Financial Responsibility may be furnished in one of two ways:

1. By filing a Certificate of Insurance for \$5,000 for injury to one person, \$10,000 for injury to more than one person and \$5,000 for property damage.
2. By depositing \$1,000 in CASH or a surety bond.

The first way is easy. The second way is difficult. 24 states and 8 Canadian Provinces now have Financial Responsibility laws. COME IN and see us or Phone 6109 and we will further explain the new Ohio Drivers Responsibility Law.
